

AUTO INSURANCE RATES FOR THIRD QUARTER 2002

Ontario private passenger auto insurance rates rose during the third quarter, July 1 to September 30, 2002.

The rate applications approved during the third quarter of 2002 indicate an average increase of 8.33 per cent, when weighted by market share for those insurers making rate changes. This compares to an average increase of 5.90 per cent for rate applications approved during the second quarter, April 1 to June 30, 2002.

The average cost of auto insurance in Ontario at the end of the third quarter of 2002 was 11.99 per cent higher when compared with the end of the third quarter a year earlier. This calculation is based on the renewal effective dates of the rate changes. The average cost of auto insurance is now 6.9 per cent higher than the third quarter of 1996, preceding the introduction of Bill 59 (the *Automobile Insurance Rate Stability Act, 1996*) on November 1, 1996.

The approved rate change shown for each insurance company is the average for that particular company. The impact of a rate change on an individual consumer will vary depending on where the consumer lives, the type of car he or she is driving, and other risk characteristics.

FSCO will continue to ensure that insurance companies' rate changes are reasonable and justified, and that the rates insurers charge are balanced with their ability to meet their future claims costs.
